

About Henning Fehrmann

Henning Fehrmann is an entrepreneur, engineer, and CEO of the Hamburg-based [FEHRMANN Tech Group](#), which he has led as the fifth generation of the family-owned business since 2008. Under his leadership, the company has evolved into a technology-driven group with several independent business divisions spanning advanced materials, industrial AI, maritime technologies, security-critical applications, and intelligent glass solutions.

The Group includes [FEHRMANN Materials](#), [FEHRMANN MaterialsX](#), an Industrial AI startup and developer of the MaterialsX Enterprise Platform, [FEHRMANN Windows](#), which provides solutions for maritime and security-critical environments, and [Apprisify](#), a specialist in intelligent glass and interface technologies enhanced by augmented reality and artificial intelligence.

Fehrmann studied Industrial Engineering in Rostock, Berlin, and Berkeley. He is recognized as an expert in industrial innovation, artificial intelligence in industrial environments, and the transformation of technology-driven businesses.
