

About FEHRMANN MaterialsX

MaterialsX is the software and AI unit of the [Fehrmann Tech Group](#), an internationally operating, technology-driven industrial group headquartered in Hamburg, Germany. MaterialsX develops data- and AI-driven software solutions that enable engineers to make complex technical decisions faster and with greater accuracy.

The MaterialsX Enterprise Platform is the core solution developed by MaterialsX for industrial applications. It helps companies optimize development processes and significantly shorten innovation cycles.

It builds on the group's deep expertise in materials science and production within its [Materials](#) division, where high-performance industrial materials such as aluminum alloys are developed, and translates this industrial foundation into data-driven, AI-powered software.
