

About FEHRMANN Tech Group

The [FEHRMANN Tech Group](#) is a fifth-generation, internationally operating, technology-driven industrial group headquartered in Hamburg, Germany, led by CEO Henning Fehrmann. The company combines deep industrial expertise with emerging technologies and develops independent solutions in the fields of advanced materials, industrial AI, and maritime and safety-critical applications.

The group includes [FEHRMANN Materials](#) and [FEHRMANN Materials X](#), which focus on materials development, as well as the resulting MaterialsX Enterprise Platform—an AI-driven solution that enables engineers to make faster and more informed technical decisions in industrial environments. The portfolio is further complemented by [FEHRMANN Windows](#), specializing in advanced window systems for maritime and safety-critical applications, and [Apprisify](#), a spin-off of the FEHRMANN Tech Group, which develops intelligent glass and head-up display technologies for maritime, safety-critical and commercial environments.
